By partnering with customers across a multitude of markets we are able to design new or enhance existing systems. Our primary technologies are pneumatics, hydraulics and electromechanical systems. We have the engineering expertise, product knowledge and field experience to custom manufacture a wide range of engineered systems, such as hydraulic power units, filtration systems, pneumatic and electronic control panels.

**Engineered Systems**

By partnering with customers across a multitude of markets we are able to design new or enhance existing systems. Our primary technologies are pneumatics, hydraulics and electromechanical systems. We have the engineering expertise, product knowledge and field experience to custom manufacture a wide range of engineered systems, such as hydraulic power units, filtration systems, pneumatic and electronic control panels.

**Products**

**Hydraulic**
- Pumps & Motors
- Cylinders & Rotary Actuators
- Valves & Manifolds
- Hose & Fittings
- Accumulators
- Filtration

**Pneumatic**
- Actuators & Grippers
- Compressors, Vacuum Pumps, Air Motors & Blowers
- Valves & Manifolds
- Clamps, Grippers & End Effectors
- FRL Units & Dryers
- Vacuum

**Electromechanical, Drive & Controls**
- Drive Control
- Gearheads & Gearmotors
- Stepper & Servo Motors & Drives
- Cartesian & Gantry Systems
- HMI, Sensors & Controls

**Mobile Equipment**
- Hydrostatic Pumps & Motors
- Electronic & Wireless Radio Controls
- Winches & Hoists
- Serial Production Systems

**Industrial Power Tools**
- Pneumatic & Electric Tools
- Self Feeding Drills/Tappers
- Advanced Drilling, Fastening & Screwfeeding Systems
- Balancers & Hoists
- Precision Torque & Angle Control

Wainbee Limited is a solutions provider in engineered systems, products and services for motion & control, filtration and automation solutions.
Engineered Systems

By partnering with customers we can assist with lubrication best practices, supply filters, filtration systems and custom designed solutions. Our solutions range from lubrication storage to engineering filter skids with the goal of extending equipment life across an array of diverse industries to maximize the life of your assets.

Products

Hydraulic & Lube/ Oil Purification
- High Viscosity Oil Lube Filtration
- Desiccant & Coalescing Filters
- Magnetic Filtration
- Automatic Lubricators
- Portable Filter Carts, Filter Skids and Filtering Systems
- Varnish Removal & Vacuum Dehydration System

Process and Water
- Self-Cleaning Filtration
- Single & Multi Bag Housing
- Single & Duplex Baskets and Screens
- Membrane Cartridges
- Pipeline Strainers
- Automatic Backwash Strainers and Filters

Diesel Fuel Filtration
- Water and Particulate Removal from Diesel Fuels
- Coalescing and Absorbing Filtration Technology
- Bulk Diesel Skids
- On-board Diesel Filtration
- Fuel and Biofuel Filtration and Pre-treatment Products

Compressed Air & Gas
- Coalescing Filters
- Air/Oil Separators
- Dryers (Refrigeration or Desiccant)
- Medical & Breathing Air Systems
- Nitrogen Generators
- Sterile Air
- Chillers

Oil Mist, Weld Fume, Dust Collection
- Electronic Mist Filtration
- Gas & Fume Extraction
- Self-cleaning Electrostatic Air Cleaners
- Air Purification Systems

Services
- Consulting
- Custom Designed Solutions
- Service Contracts
- Lubrication Best Practices
- Vendor Managed Inventory
- Educational Seminars
- Electronic Order and Information Access
- Machinery Lubrication & Contamination Control Training
- Plant Reliability Proposals for Filtration Efficiency
- Equipment Rentals

Our Filtration Specialists work with globally recognized brands and have over 30 years of experience providing customized solutions for all your Industrial and Process Filtration needs. Utilizing our over 40 Application Specialists, our Technical Outside Sales Teams work with you to determine the optimum level of filtration and design systems for your plant reliability peace of mind.

Wainbee’s Choice

Des-Case helps companies improve overall equipment reliability increasing productivity and profitability by extending lubricant life. Des-Case products extend the life of industrial lubricants by preventing contamination with desiccant breathers, fluid handling products and visual oil analysis equipment.

Filtration Group GmbH (formerly Mahle Filtration) are Filtration specialists in Fluid Separation, Liquid and Gas filtration, Hydraulic Fluid filtration and Automatic Filters and Strainers.

Parker’s domnick hunter filtration division is the global leader in gas generation and filtration having the most complete product line of Air Treatment and Nitrogen Generators, Desiccant Dryers, Refrigerated Dryers, Biogas Filtration and Chillers.

Parker Filtration assures the highest quality and innovative products of hydraulic filtration, fluid conditioning and condition-monitoring solutions.

Parker Process Filtration provides Bag and Cartridge filters, Capsule and Membrane cartridges, Gas/ Liquid coalescers.

Parker Racor is the leading manufacturer of Fuel, Oil, Air, CCV, CNG Systems, Aftermarket Elements/Kits for mobile equipment.

Schroeder Industries is a leader in fluid filtration and conditioning technology. With over 65 years of filtration experience, Schroeder designs, manufactures and markets innovative filtration solutions for hydraulic, lubrication, fuel and process systems.

Recommended Brands

Donaldson helps solve some of the world’s most complex filtration and contamination control challenges, and is one of the largest global providers of unique filtration technologies and high-quality filters and parts.

Fluitec provides leading edge technologies and expertise to maximize asset life by improving lubricant performance and plant reliability through Fluid Enhancement, Contamination Control and Condition Monitoring.

Sepflutech has long term experience in research and development, engineering & production and worldwide sales of the separation technology. Apart from standard systems like Bilge water separator, Fuel and Oil Treatment systems which can be integrated in existing applications, Sepflutech can offer customized solutions in the field of filtration and separation of liquids.
