

Accessories

Tailor and protect the performance of your Gast products.

Gast regulator valves allow the air pressure to be reduced to the appropriate level for your specific application

Gast air pressure and vacuum gauges are specially designed for Gast products and allow you to monitor the performance of your system.

Genuine Gast filters trap contaminants from entering the air intake which is critical to extending the life of your product.

Genuine Gast lubricant reduces working temperatures, carries away particulates and creates a seal between critical components to provide higher performance and to extend the life of your product.

Gast tank assemblies improve your application's cycle time by instantly providing air on demand. Tank assemblies can easily be integrated with your existing Gast products to provide a steady flow of air without pulsations.

Gast switches are set to the proper pressure/vacuum at the factory ensuring that your system operates correctly and safely.

Accessories

Tailor and protect the performance of your GAST products.

Gast Accessories	Benefit	Air and Vacuum Systems	Air Motors and Gear Motors	Diaphragm Compressors	Piston Compressors	Regenerative Blowers	Rocking Piston Compressors	Rotary Vane Compressors	Vacuum Generators
Combination Filter-Regulator-Lubricator (FRL)	GAST FRL's protect and optimize the performance of your Gast air motor. The filter removes water and contaminants out of the compressed air preventing possible damage to the air motor. The regulator allows for the air pressure to be adjusted and ensures a constant feed pressure to the air motor. The lubricator provides a steady, metered stream of oil to cool and protect your Gast air motor.		■						
Gauges	Gast air pressure and vacuum gauges are specially designed for Gast products and allow you to monitor the performance of your Gast products.	■	■	■	■	■	■	■	■
Pressure/Vacuum Switches	Gast switches are set to the proper pressure/vacuum at the factory ensuring that your product operates correctly and safely.	■		■	■		■	■	
Pressure Relief Valves	Gast pressure relief valves are sized specifically for Gast products to prevent system damage from over pressurization.	■		■	■	■	■	■	■
Regulator Valves	Gast regulator valves allow the air pressure to be reduced to the appropriate level for your specific application.	■		■	■	■	■	■	■
Feet/Foot Bracket	Gast feet/foot brackets offer multiple mounting options and are supplied with necessary mounting hardware.	■	■	■	■		■	■	■
Isolation Mounts	Gast isolation mounts further reduce the noise and vibration of the unit for sensitive applications.	■		■	■	■	■	■	■
Cord Sets	Gast cord sets are available for applications where the system is not hard wired. Cord sets are sized specifically for the voltage and amperage of your product.	■		■	■	■	■	■	■
Handles	Handles are available for applications where portability is necessary. Gast handles are designed to attach to your product with no modifications required.	■		■	■	■	■	■	■
Mufflers	Gast mufflers are sized specifically for the air flow of your product can reduce noise levels by 7-10 dBA for noise sensitive applications.	■	■	■	■	■	■	■	■
Tank Assemblies	Gast tank assemblies improve your application's cycle time by instantly providing air on demand. Tank assemblies can easily be integrated with your existing Gast products to provide a steady flow of air without pulsations.	■		■	■		■	■	
Solvents	Gast AH255D is a specially formulated solvent that removes sediment and dissolves old oil and carbon dust to keep your product running at maximum performance. AH225D is compatible with the materials used in Gast products and will not harm internal components.	■	■	■	■	■	■	■	■
Filters	Genuine Gast filters trap contaminants from entering the air intake which is critical to extending the life of your product.	■	■	■	■	■	■	■	■
Jars	Like filters, jars help to trap contaminants from entering the air intake and extend the life of your product, while also helping to reduce the noise of the unit. Gast offers jars in multiple materials and sizes to suit your application.	■						■	
Lubricant	Genuine Gast lubricant reduces working temperatures, carries away particulates and creates a seal between critical components to provide higher performance and to extend the life of your product.	■	■					■
