

New Wainbee e-commerce site makes browsing and shopping far easier

November 17, 2021

For more than 70 years, **Wainbee Limited** has been the top Canadian source for industrial solutions in automation, filtration, and motion and control. Now, it is easier than ever for customers to find and purchase the products they need for their businesses, as the company has recently launched a new e-commerce website.

This site offers not only a new look, but also a broad variety of features and solutions to meet any customer needs, with a huge range of **brands** and products available.

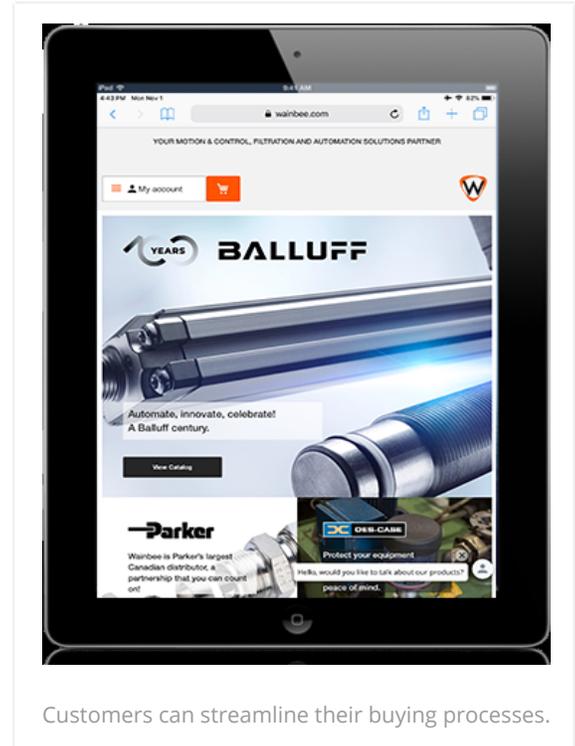

Full of B2B features that allow for easy account management

Wainbee has created a platform that gives customers the ability to streamline their quoting or purchasing process, while also gaining access to many B2B features and functionalities.

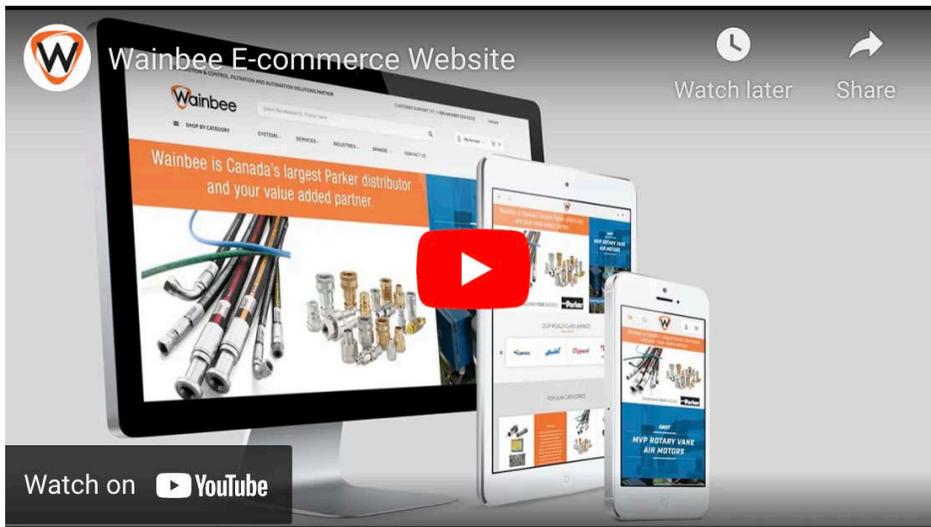

Placing orders, shipment tracking, access to custom catalogues and special pricing, along with maintaining an organization's entire buyers' group, have never been easier! Wainbee recognized the need for the ability to manage these things from a customer's perspective, but now offers it through a responsive digital platform as well. The intent is that a customer can receive the same service, whether they are online or calling into the office.

Whether you want to check the status of an order or need technical help related to a product or service – the live chat feature immediately connects the customer in real time to a Wainbee Technical Sales Representative.

Wainbee remains one of the country's top solution providers in automation, filtration, and more, with more than 250 employees in coast-to-coast branches.

Check out the video below to get a fast overview of the new site:
