2/19/19

Dear Valued Customer,

As your supplier, we are well aware of the requirements passed down from the Securities and Exchange Commission mandating a company statement of reasonable country of origin inquiry (RCOI) of conflict materials.

Since the inception of the Frank –Dodd Wall Street Reform and Consumer Protection Act of 2010, Parker Parflex Division has worked with our suppliers to determine if the following is contained within our supply base;

Columbite-Tantalite (coltan, tantalum)
Cassiterite (Tin)
Gold
Wolframite (tungsten)
Derivatives of these four materials

We have attached a matrix showing the results of our supplier surveys by commodity and by Parflex Product groupings. We have also provided the industry standard EICC conflict minerals reporting template which includes detailed information pertaining to our declaration.

This statement is based on our current level of knowledge and understanding of the materials supplied. Since conditions exist that are outside of Parker Hannifin's control, Parker makes no warranties, express or implied, and assumes no liability in connection with any use of this information.

Best Regards,

A handwritten signature in cursive script that reads "Bill Dougher".
