

FARM FUTURE: PROCESSING SOLUTIONS

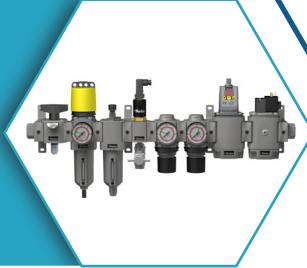

PARKER TRANSAIR®

Transair® has become the trusted brand for aluminum compressed air piping. Transair® offers both aluminum & stainless steel piping for compressed air, vacuum, industrial / inert gas, process water & chemical transfer applications.

PARKER GLOBAL FRL

Fast cycle times, high product quality & low downtime all require a clean, dry pneumatic system to function properly. Parker has what it takes to make sure pneumatic systems perform at their best.

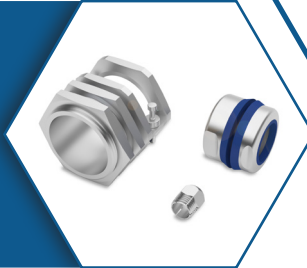

PARKER LEGRIS

Legris® ranges of fittings & tubes make it possible to quickly build & secure your low pressure circuit. Thanks to a wide variety of shapes & configurations, you can find the ideal product to optimize the use of your machines.

BALLUFF SENSORS

Balluff supplies a wide variety of brackets & sensor protection mounting hardware designed to decrease installation costs, prolong sensor life expectancy, reduce unplanned downtime & increase the overall performance and utility of sensors.

ALTERNATIVE PROTEIN PLANTS...

...are experiencing a huge surge in demand, and we recognize that this comes with an initiative to automate processes while still maintaining a commitment to sustainability, and quality.

To keep a competitive advantage and reduce operating costs, whether it's within simple farming processes, automated harvesting, packaging, or optimizing your plants productivity, the industry needs to become sophisticated with growth plans continuing well into the future.

WHAT WAINBEE CAN DO...

...Wainbee can support this market from farm to facility. Bring us the application and we will show you viable cost effective solutions to get the job done. Many of our brands used today are designed to withstand the rigors of outdoor applications, ammonium nitrates and enzymes from processing plants to help extend the life of production equipment.

FARM FUTURE: PROCESSING SOLUTIONS

PARKER INSTRUMENTATION

Highly engineered instrumentation & systems ranging from compression tube fittings, cone & thread fittings, needle valves, ball valves, compact stream switching valves to modular process to instrument valve packages.

DES-CASE RELIABILITY

Combining unique services, a wide array of products & solid support, Des-Case can help increase uptime, reduce costs & gain greater efficiencies for your equipment.

HASKEL TESTING SYSTEMS

Haskel has the high-pressure expertise, innovation & diverse technical skills to design fully integrated Liquid Transfer & Pressurization systems for a wide range of complex applications.
