

COVID-19 SUPPORT

Motion & Control · Filtration · Automation Solutions

A Partnership You Can Count On

For over 60 years Wainbee Limited has been a leader in applications requiring automated and semi-automated control using Fluid Power, Motion Control, Filtration and Automation products. As we now find ourselves in the middle of a global pandemic, we all recognize that the medical industry and health science technologies, specifically within automatic ventilator manufacturing, are advancing rapidly. Large manufacturers are working tirelessly to develop and design newer technologies to contribute their part towards the fight against COVID-19.

Wainbee Limited is proudly promoting our partnerships and strong source of supply, as well as ensuring we do our part in the battle against COVID-19 by providing quality products with technical support services to those who are currently in development of medical or healthcare equipment. Our partnerships with our globally recognized brands allow us to offer the required critical components needed in essential devices being used in our emergency care systems today.

Advantages of Working with Wainbee

We are structured to provide seamless coast to coast support for your needs and have the capacity to adjust logistics channels internally through our 16 locations in the event of provincial service disruptions.

We are continuously available to manufacturing and R&D through all means of virtual collaboration and have historical experience to aid in identifying products and solutions in medical apparatus.

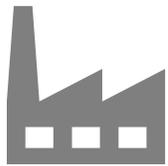

We can respond quickly to all other essential services to help identify potential manufacturing problems and constantly seek out new opportunities to improve performance, reduce maintenance downtime and extend machinery life.

We Provide Engineered and Integrated Solutions

We look at each item closely to assess performance and outcomes. We treat products as critical functional components, not commodities.

We Represent Proven Products

We partner with manufacturers whose products and solutions outperform the competition and can recommend the correct products to meet customer's specifications and demands, and not be held to a specific supplier's product limitations. Life Sciences has always been part of our community at Wainbee and we are ready and able to support its initiatives now.

Integrated Motion & Control, Filtration, & Automation Solutions for Life Sciences

Valves & Pressure Regulators

- Gas Mixing Proportional Valves
- Sensor Calibration Valves
- Flow Control Valves
- Exhalation Back Pressure Control Valves
- Self Relieving Pressure Regulators
- Electronic Valves
- Solenoid Valves
- Specialty Cleaning & O₂ Service

Medical Grade Device Connections

- Leak Tight Fittings for Tubing Components
- Quick Disconnect Couplings
- Full Line of Sterile Aseptic Connections
- Plastic Medical Connectors
- LIQUifit for Reliable & Compact Liquid Transfer

Compressors & Gas Boosters

- Quiet, Highly Efficient Oil-less Rocking Piston & Diaphragm Compressors, Ensuring the Discharge Air Remains Free of Contamination from Lubricants
- Efficient Air-driven Gas Booster for Delivering High Pressure Gases

Filtration

- Filters & Regulators
- Nitrogen Gas Generators
- Air Purifiers
- Disposable Filter Units
- Breathing Air Units
- HEPA Grade HVAC Filtration

Partnerships Are Key. We're In This Together.

While we're only representing some of our top suppliers for critical components needed in today's battle, Wainbee represents many more globally recognized brands that can support any Motion & Control, Filtration or Automation initiatives.
