

# Snow Blower Shock Absorption

Temperature to  $-43^{\circ}\text{C}$

Traceable with Parker PTS

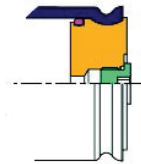

Quick & Easy  
Pipe & Hose Installations

## Robust Construction

The ACP series accumulators are characterized by compact, highly resistant, permanently assembled and sealed steel plugs and casings, which are sealed by a revolutionary crimping process.

- Effective heat dissipation prevents degradation of fluids and seals
- Superior resistance to fatigue
- Micro-finishing for extended sealing time

We are experienced in solving the snow blower shock absorption problem.
