Step 1: Locate Part Number
Locate the part number laser engraved on the valve body:
PFV-WXX-MXXXC-XXXX

Step 2: Connect Current Supply
According to the part number on the side of the valve
PFV-WXX-MXXXC-XXXX
24 = 0...175mA
12 = 0...350mA

Step 4: Connect Air Source
PFV-WXX-MXXXC-XXXX
This number indicates the maximum operating pressure in kPa
(100 kPa = 14.5 psi)

Step 3: Install Valve onto Manifold
PFV should be installed in accordance with dimensional drawing. Torque using a 24mm wrench to 45 inch-pounds

Enfield Manifold Part Number: A-MFD-01-001

WARNING: Installation and operation of electronic and high pressure systems (fluids and compressed gas) involves risk including property damage and personal injury or death. Users should be properly trained or certified and take safety precautions.
